

**SILENCE IS GOLDEN** Hush Curtain is an acoustic privacy panel that is a less costly and higher functioning option than more traditional room acoustic treatments. The panel is made from regular fabric, but also includes pockets that house acoustic inserts to help absorb noise and reduce reverberation.

**DUAL-PURPOSE DISPLAY** The new LQ630H LED series incorporates the Pro:Centric Applications Platform, which enables Java and Flash-based applications to run on the TV. Systems integrators can use this standards-based application platform to offer patient-room television interactivity that creates a more homelike user experience and streamlines delivery of information.

**STURDY STORAGE**

Designed to securely store and organize valuable tools and parts, the ready-to-assemble AkroBin cabinet offers users a variety of storage options, including four adjustable 100-pound-capacity shelves and a lowered back panel. Manufactured from 18-gauge steel with a 16-gauge steel base, the cabinet includes a flush-mount handle.

**BREATHE EASY** The MediDock idle-elimination system is a full-service docking station for ambulances that provides stationary power for on-board batteries and medical equipment plus HVAC for temperature control inside the vehicle. Ambulance drivers can shut off their engines without fear of losing power to the batteries and any medical equipment that needs to be regulated at specific temperatures.
